FOR SMART COMPANIES

Contract Logistics

Integrated Logistics Solutions

We operate on your premises, in your storage areas, integrated into your supply chain (inhouse outsourcing)

Dedicated Logistics Solutions

Logistics solutions developed exclusively for your needs in an optimised logistics area

Multi-User Logistics Solutions

We offer you all the classic, logistical services and solutions for your products in our storage areas, with our equipment

SINGLE SOURCING

Fulfillment Solutions

Inbound Planning

We ensure a smooth flow of your inbound shipments. Efficient container management and customs processes will help to manage your cost.

Quality Inspection

Our Quality Inspection team thoroughly examines your products, ranging from straightforward visual inspections to extensive functional tests.

Storage

The combination of our fully automated small parts storage system, shelving systems, pallet racks and block storage areas, provides the optimal solution for a multitude of requirements.

Picking

There is no standard. We analyse your business profile to apply an efficient pick and pack strategy.

Repairs

We have the capability to handle various tests and repairs on-site through our affiliated business partners.

Co-Packing & Display Build

We have a variety of semi and fully automated packaging machines as well as we have the capacity for manual packaging and display build and fill.

Serialization

Our warehouse management system provides full transparency for any serialized goods from goods-in to goods-out.

Shipping

We do provide all kind of transportation service your business needs. But we are also happy to utilize your preferred carriers.

SINGLE SOURCING

Fulfillment Solutions

Software Update

We provide software updates and localize your products.

Bundling

We convert your products into bundles and sets.

Labelling

Whether your products need a customer specific or trade compatible GTIN, we take care of the order-related labelling of your products.

You name it!

We look forward to new customer requests. Contact us.

Customer Service

We provide services across all communication channels, including telephone with call-back service, online forms, email, and live chat.

Returns Handling

We examine your returns and classify your goods according to a predefined criterias.

Refurbishment

We clean, polish, complete and repack your goods to mint condition.

Amazon

Labeling, EDI messages and notification via the Amazon portal in accordance with the Amazon regulations for the preparation and transportation of shipments are part of our extended standard.

FOR INDIVIDUAL CUSTOMER REQUIREMENTS

Technical services
